

Digitise Documents to Save Time and Hassle with **Sirius OCR 365**

Sirius app

Paperwork made digital, accurate, and secure

www.siriusapp.co.uk

- Is manual data entry slowing down your organisation?
- Want to digitise paperwork and improve searchability?
- Need an integrated solution for text recognition and extraction?

Unleash the Power of Text Recognition with **Sirius OCR 365**

That's right!

Experience the power of advanced Optical Character Recognition (OCR) technology with the Sirius OCR 365—a **simple app** that digitises texts from documents, scans, and images, like purchase or sales orders, saving you a ton of time and hassle.

Sirius OCR 365 **integrates seamlessly with Dynamics 365 business** applications, like Business Central, Finance, and Project Operations so that your data remains up-to-date, secure and accessible at all times.

But that's not all, it comes pre-trained and has machine-learning capabilities, so that it continues to improve its performance and accuracy over time.

Why **Sirius OCR 365**?

1

Save Time and Effort

Eliminate the need for manual data entry, save hours of work, and reduce human errors.

2

Improve Searchability

Make your paperwork more searchable and find the information you need when you need it easily.

3

Edit with Ease

Modify and edit scanned texts just like any other digital document without any hassle.

4

Enhance Accessibility

Make information more accessible to everyone—from remote coworkers to visually impaired customers by converting printed materials into readable text.

5

Affordable Pricing

Documents containing up to 50k pages are priced at £600, and each 30k page upgrade incurs an additional £200, ensuring an optimal cost per document of £0.4 or lower.

6

Optimised Retraining

Schedule retraining during weekends so you can use workdays for document processing.

7

Go Green

Reduce paper consumption with digitised paperwork and help create a more sustainable environment.

Who Can Benefit from **Sirius OCR 365?**

- **Banking Sector:** Reduce the turnaround time for customer verification, loan or credit approvals, and more.
- **Finance Sector:** Capture and process customer and transaction data in moments, regardless of the format it comes in.
- **Legal Industry:** Digitise endless legal documents and archive them easily.
Healthcare Sector: Convert medical records and claims to streamline administrative tasks easily.
- **Logistics:** Track the processing of raw materials and finished products from printed labels automatically and accurately.
- **Education Sector:** From academic materials and guides to test papers and quizzes, digitise documents to capture and process written texts like never before.
- **Individuals:** Organise personal files, convert old documents into editable text, and never lose personal data.
